Subject Index

A
AC–DC power system, 767
Adaptive
  beamforming, 675
  control, 503, 925
  pole placement, 503
  stabilization, 627
Aggregation of incomplete preferences, 205
Airborne antenna array, 3
Analysis, 833
ARCH, 227
Asymptotic optimality, 675
Awards, Franklin Institute, 1187
Axiomatic approach, 205
Axioms of uncertainty, 1093

B
Bilinear transformations, 533
Blind identification, 3
Bond
  graphs, 1225
  graph model, 379
Bounded fuzzy sets, 851

C
Cellular
  automata, 799
  neural network, 903
Chaos, 687
Chaotic
  oscillators, 687
  systems, 925
Characteristic function, 1219

PII: S0016-0032(00)00005-3

Cloning template, 903
Closed loop, 1055
Combustion control, 1283
Computer spreadsheet, 1063
Concurrent systems, 833
Control, 237
Control
  constraints, 449, 1075
  Lyapunov functions, 649
Convection–diffusion equation, 821
Convergence, 721
Convex models, 1093
Current conveyors, 735

D
Data-flow program, 1135
DC-motor and load, 481
Decentralized decision-making, 301
Delay differential, 1175
Delay, 755
Delayed system, 911
Descriptor system, 549
Design, 1063
Digital filters, 799
Direct
  control, 701
  search optimization, 523
Dirichlet, 809
Discrete
  data, 809
  two-time-scale systems, 973
Discrete-time linear systems, 1263
Distributed sources, 3
Disturbance rejection, 701
Dynamic process, 903

E
Eigenstructure assignment control, 1049
Eigenvalues, 833
Eigenvalue plot, 1209
Empirical estimation, 285
Energetics, 423
Energetic stability, 851
Energy partitioning, 423
Envelope and phase, and their derivatives in time, 1013

ε-Bound problem, 1209
Evaluation, 1135
Evolutionary programming approach, 711
Expert system, 1063

F
Fading, 3
Fast Fourier transform (FFT), 159, 955
Fast Hartley transform, 955
Feature selection, 809
Feedback control of beams, 1175
Feedforward networks, 285
Financial data, 227
Fixed point, 1219
Fixed-order dynamic compensation, 435, 1283
Flow, 1249
Forces estimation, 875
Fourier transform, 1219
Fractional mechanical system scheme, 423
Franklin Institute Awards, 1187
Fusion rule estimation, 285
Fuzzy
  closed-loop system, 983
  control, 851
  controller design, 983
  equilibrium point, 851
  implication, 1023
  system stability, 851

G
Gaussian, 1219
Generalized sampled-data hold functions, 503
Genetic algorithm (GA), 1135, 1249
Geometric approach, 701
Global uniform attractor, 449

H
H_2/L_1 design, 435
Hadamard product, 749
Hamilton–Jocobi–Bellman conditions, 649
Helicopter dynamics, 783
H_∞ control, 911
HMF-method, 481
Hole-filler, 903

Hurwitz
interval polynomials, 749
stability, 533

I
Identification, 1055, 1309
Impulse controllability, 549
Inference with uncertainty, 1093
Infinite-dimensional systems, 701
Information-gap models, 1093
Input nonlinearities, 649
Input-to-state
practical stability (ISpS), 893
stability (ISS), 893
Integral
controller, 1119
transform method, 821
with Hankel kernel, 1007
Interval systems, 711
Invariant subspaces, 701
Inversion, 1225

J
Jumping parameters, 1263

K
Kalman filter, 875
Known disturbances, 701

L
Least-squares method, 1309
L_∞ equi-induced norm, 435
Liar paradox, 1023
Linear
combination of polynomials, 533
matrix inequality (LMI), 755, 1263
Linguistic performance, 983
List scheduling, 1135
LJ optimization procedure, 523
Locally optimum detection, 675
Loop transfer function realization, 1049
Lorenz systems, 925
LPC, 159
Lyapunov second method, 1075

M
Markov processes, 939
Mixed-norm, 435
Model reduction, 523
Modeling, 833
Modelling/identification, 721
Models of phenomena with random structure, 939
Monte Carlo method, 1007
Multibody system analysis, 783
Multinomial, 809
Multipath, 3
Multiprocessor scheduling, 1135
Multivariable systems, 1309

N
Nadaraya–Watson estimator, 285
Narrow-band Gaussian random noise, 1013
Narrowband interference suppression, 1199
Network delay, 1249
Neural
  networks, 721, 1249
Non-additive non-Gaussian noise fields, 675
Non-central gamma distribution, 1007
Non-stationary sinusoidal signal, 1013
Nonlinear
  continuous-time dynamics, 481
  control, 649
  systems, 721, 893
Nonstationary stochastic processes, 939
Normalizability, 549
Numerical inversion method, 955

O
Observer, 1119
Oscillators, 687, 735
Output feedback controls, 449

P
Paired comparisons, 205
Parameter
  estimation, 503, 627
  insensitivity, 701
Parameterized Lyapunov functions, 473
Parametric
  approach, 159
  uncertainty, 473, 1283

Petri nets, 833
Physical parameters estimation, 481
PID control, 1055
Pointwise time-delayed feedback displacement, 1175
Positive definite, 1219
Probabilistic interpretation of Hankel transform, 1007
Probability distributions, 1013
Program net, 1135
Propeller scattering, 3
Pseudo-random binary sequences, 799

Q
Quality, 1063

R
Recursive least squares, 875
Reliability, 1063
Riccati equation, 911
Robust
  control, 1075, 1263, 1283
  estimation, 159
  stability, 549
  stability analysis, 711
  stabilization, 473
Robustness, 755, 1155
Rotating machines, 875
Route, 1249

S
Sampled-data controllers, 503
S&P 500, 227
Saturation control, 649
Schur stability, 533
Season fusion, 301
Self calibration, 237
Sensor fusion, 237, 285
Sequential analysis, 301
Sign detector, 1155
Singular
  perturbation, 973
  system, 549, 911
Singularly
  perturbed systems, 449, 1209
Sliding mode, 1119

Small-gain theorem, 893
Spectral estimation, 159
SPR0 functions, 749
Spread spectrum systems, 1199
Stability, 755
Stability
  bound, 1209
  robustness, 973
State space modeling, 1283
State-feedback controller, 767
Strong mixing noise, 1155
Structural properties, 833
Structurally damped systems, 1175
Structured uncertainty, 973
Subspace analysis, 1199
Switched systems, 379
Synchronization, 925
System identification, 783

T
Thermoacoustic instabilities, 1283
Time delay, 473
Time-delay systems, 711, 1263
Time-periodic systems, 783
Time-scale separation, 973
Transmissibility, 875
Two-dimensional Laplace transform, 955

U
Unbiased estimators, 1309
Uncertain systems, 449, 1075
Uncertainty modelling, 1093
Unmodelled dynamics, 627
Unstable system, 1055
Unstructured uncertainty, 973

V
Variable structure control, 1119
Vector space methods, 285
Virtual rotation, 237
Volatility forecasting, 227
